RESEARCH STRATEGY

Core cluster: ASSETS → CHI → ISMAR → CSCW covers every dimension of your profile.

Deaf/HoH + MR: Same work, two framings — technical to IEEE VR / ISMAR; user-centred to ASSETS / CHI.

Haptics for Deaf/HoH: TEI, EuroHaptics, and IEEE ToH are ideal for vibrotactile work.

Top journal pick: ACM TACCESS for Deaf/HoH; IEEE ToH for haptic systems.
